Patina Effect can be used for surfaces such as MS, SS, Brass, Copper, Bronze and metal substrates.

Patina is the ideal product for creating particularly attractive decorative effects on internal walls.

Bring Lazlo Patina coating into your next Art or Architectural project without using expensive copper, liquid paint or sublimation.

We offer different patinas for various metals.

Patinas for Mild Steel (MS):

- Black
- Brown
- Galvano Black
- Rust
- Rainbow

Patinas for Stainless Steel (SS):

- Black
- Various shades of grey and brown can be achieved by dilution with water.

Patinas for Brass, Copper, and Bronze:

- Black/Brown
- Blue
- Green

Important:

After applying patinas to metals, a protective clear coat is required.

- For indoor applications, standard clear coats are sufficient.
- For outdoor applications, PU clear coats are recommended for longer-lasting protection.

Please Note:

Any untreated surface should be coated with red oxide and non-corrosive primers.
